Agricultural ladder 17 steps h693_30

Professional aluminum agricultural ladder with 17 steps. Working height 4m, weight 12kg. Reinforced structure certified EN 131 for intensive use.

The **professional aluminum agricultural ladder** with 17 steps (including the work platform) is a technical tool designed to combine **structural lightness** and **operational stability** in outdoor contexts. With a low weight of only 12 kg, it facilitates manual handling operations between rows or in complex agricultural environments, without compromising the robustness required for intensive professional use.

The construction stands out for the use of **2.5 mm reinforced aluminum profiles** and 3x3 cm riveted rungs, a configuration that allows the ladder to exceed the 50,000 work cycles required by resistance tests. Safety is guaranteed by a standard stabilizing base and **oversized non-slip PVC pads**, designed to maintain optimal grip on different types of terrain.

Technical specifications

- **Number of steps:** 17 (including work platform)
- **Maximum capacity:** 150 kg
- **Maximum working height:** 4 m
- **Total weight:** 12 kg
- **Total ladder height:** 500 cm
- **Base width:** 98 cm
- **Rung specifications:** riveted, 3x3 cm section
- **Profile specifications:** 2.5 mm reinforced section
- **Support system:** oversized non-slip PVC pads
- **Standard equipment:** stabilizing base and anchoring system
- **Regulatory compliance:** EN 131.1
- **Certification:** conformity and testing certificate included

Optional accessories

Upon request and subject to quotation, the following additional components are available:

- Pair of vertical landing handrails
- Pair of standard landing handrails
- Pair of side handrails
- Additional stabilizers
- Ladder support
