Galvanized steel pallet 120 x 100 cm h1037_05

Galvanized steel pallet 1000x1200 mm. Lightweight 3-axis structure (15.2 kg), fireproof and recyclable. Rivet fastening without welding.

The **h1037_05** galvanized steel pallet represents an advanced solution for industrial handling and storage, designed to combine **structural strength** and **sustainability**. Thanks to a **patented profiling process** and the use of optimized thicknesses without solid material, the support guarantees high mechanical performance while maintaining a low weight of only 15.2 kg. The **fireproof** nature of the steel makes it a fundamental asset for passive safety, reducing the fire load within warehouses and logistics hubs.

The structure is completely immune to thermal variations and atmospheric agents, ensuring dimensional stability in any climatic condition. The absence of welding, replaced by a **rivet fastening system**, increases the product's longevity and prevents the fragility points typical of thermal joints.

Technical features

- **Material:** high-strength galvanized steel
- **Dimensions:** 1200 x 1000 mm
- **Configuration:** 3 axes
- **Self-weight:** 15.2 kg
- **Profile:** reduced thicknesses with patented profiling technology
- **Corrosion resistance:** high, thanks to the integral galvanized coating
- **Fire behavior:** fireproof material (non-combustible)
- **Sustainability:** 100% recyclable at the end of its life cycle
- **Assembly system:** mechanical fastening via rivets (without welding)
- **Thermal stability:** insensitive to temperature fluctuations and extreme climatic conditions
- **Maintenance and hygiene:** washable surface, resistant to moisture and mold formation
- **Certifications:** compliant with energy efficiency and total recyclability standards
