Galvanized steel pallet for warehouses h1037_01

Galvanized steel pallet 800x600 mm, 9.3 kg. 3-axis structure with rivet fastening, fireproof and recyclable for sustainable and safe logistics.

The **h1037_01 galvanized steel pallet** represents an advanced solution for handling and storage in industrial and logistical contexts that require high standards of **resistance and durability**. Designed with a **patented profiling** system and assembly through **rivet fastening**, this pallet eliminates the need for welding, ensuring an intact structure that is highly competitive compared to traditional metalwork. The choice of steel with reduced thicknesses allows for a **lightweight (9.3 kg)** support without sacrificing solidity, optimizing loading and unloading operations.

This support is particularly suitable for international logistics, as the metallic material is naturally **exempt from fumigation regulations** (ISPM 15), simplifying transits between different countries. Its **fireproof** nature contributes to raising passive safety parameters within warehouses, significantly reducing the fire load compared to plastic or wood alternatives.

Technical features

- **Material:** high-resistance galvanized steel
- **Dimensions:** 800 x 600 mm
- **Configuration:** 3 axes
- **Weight:** 9.3 kg
- **Profile:** reduced thickness with no solid material
- **Corrosion resistance:** high, through galvanized coating
- **Thermal stability:** insensitive to temperature fluctuations and UV rays
- **Passive safety:** non-combustible fireproof material
- **Fastening:** mechanical with rivets, weld-free
- **Sustainability:** 100% recyclable with reduction of CO2 emissions
- **Maintenance:** washable surface and moisture-resistant
- **Certifications:** compliant with energy efficiency and total recyclability standards
