Galvanized steel pallet with 3 runners h1037_03

Galvanized steel pallet 800x1200 mm, weight 14.6 kg. 3-runner structure with rivet fastening, fireproof and suitable for international shipping.

The **h1037_03 galvanized steel pallet** represents an advanced structural solution for industrial logistics and heavy storage. Designed to exceed the functional limits of wood and plastic, this support combines **operational lightness** (only 14.6 kg) with the extreme solidity of profiled steel. Thanks to the total absence of welding and the use of a **rivet fastening system**, the pallet ensures high dimensional stability and superior mechanical resistance compared to traditional carpentry work. It is the ideal tool for companies needing maximum standards of hygiene, fire safety, and immediate compliance for international export.

Technical features

- **Material:** High-resistance galvanized steel
- **Dimensions:** 1200 x 800 mm
- **Configuration:** 3 runners
- **Self weight:** 14.6 kg
- **Profile:** Reduced profile thickness for weight optimization
- **Production process:** Patented profiling without welding
- **Assembly system:** Mechanical via rivets
- **Environmental resistance:** Anti-corrosion treatment, resistant to moisture and atmospheric agents
- **Fire behavior:** Fireproof material (reduction of fire load)
- **Sustainability:** 100% recyclable and regenerable
- **Maintenance:** Washable and sanitizable surface
- **Thermal resistance:** Insensitive to temperature swings
- **Export:** Exempt from fumigation regulations for international circulation
