Loading ramp for trucks with edges h1026_05

Aluminum ramp with lateral safety edges. Length: 179.1 cm. Upright height: 6.5 cm. Capacity: 1000 kg.

The **loading ramp H1026_05** is a professional solution designed to facilitate the **loading and unloading from trucks and vans** via **manual pallet trucks, hand trolleys** or equipment equipped with **rubber wheels**. Thanks to its **anti-slip walking surface** and aluminum structure, it guarantees safe, stable, and durable operation even in high-intensity work environments.

This ramp is part of a range of products designed for **logistics companies, movers, beverage suppliers, and event organizers**. The **increased internal width (940 mm)** allows for the comfortable passage of even wider trolleys, while the **29 mm lateral edges** increase safety by preventing accidental cargo falls.

The **anchoring system with aluminum tongue** allows for precise fixing of the ramp: the tongue can **slide along the entire width** and **rotate in the header**, adapting to the vehicle's loading bed. The included **header end caps** prevent accidental sliding of the tongue during use.

With a **capacity of 1000 kg at 1000 mm wheelbase**, it is ideal for intensive use, while the **compact size and low weight (27 kg)** make transport and handling easy.

Order **the H1026_05 ramp today!** The ideal solution for truck loading in a safe, fast, and uncompromising way.

Technical characteristics:

- **Type:** loading ramp for trucks with edges
- **Material:** aluminum
- **Walking surface:** anti-slip
- **Standard length (L):** 1791 mm
- **Internal width (A):** 940 mm
- **External width (B):** 1000 mm
- **Edge height (C):** 29 mm
- **Upright height (D):** 65 mm
- **Overall dimensions with edges (E):** 83 mm
- **Capacity:** 1000 kg at 1000 mm wheelbase
- **Unit weight:** 27 kg
- **Anchoring system:** mobile aluminum tongue + header end caps

User benefits:

- **Ramp:** perfect for loading/unloading operations from trucks and vans.
- **Maximum:** safety thanks to lateral containment edges.

- **Easy:** to fix thanks to the adjustable aluminum tongue.
- **Surface:** anti-slip for greater stability during use.
- **Wide:** useful section for large trolleys.

FAQ:

1. **Is the ramp compatible with all pallet trucks?**
   Yes, it is designed for use with pallet trucks and rubber-wheeled trolleys, even larger ones.
2. **Is it suitable for loading/unloading from trucks?**
   Yes, it is optimized for truck platforms or vans with compatible height.
3. **Is this ramp equipped with edges?**
   Yes, it is equipped with lateral edges.
4. **Does it require installation?**
   No, the ramp is removable and ready for use. Just fix it using the supplied tongue.
5. **How much weight can it support?**
   The ramp supports up to 1000 kg distributed at a 1000 mm wheelbase.

Mini buying guide:

Choosing a **ramp with edges for trucks** means investing in **safety and versatility**. The **H1026_05** model is designed for those who perform frequent loading and unloading from wheeled vehicles.

The **lightweight yet resistant aluminum structure**, combined with an anti-slip surface and **lateral containment edges**, makes this ramp ideal for warehouses, mobile logistics, and transport.

The **intelligent anchoring system** allows for quick installation on any compatible surface, while the ergonomic design ensures ease of use even in tight spaces.

Loading ramp for trucks H1026_05, aluminum ramp with edges, logistics ramp for pallet trucks, anti-slip ramp for trolleys, safe truck loading ramp.
