Loading ramp without edges capacity 1000 kg h1026_08

Aluminum ramp without edges, non-slip and removable. Length: 199.1 cm. Upright height: 6.5 cm. Capacity: 1000 kg.

The **H1026_08 loading ramp** is designed for all environments needing an efficient, safe, and easily positionable solution for daily **loading and unloading** operations. Ideal for **logistics companies, couriers, movers, trade fairs, and beverage distributors**, this **non-slip aluminum** ramp is perfect for use with **hand pallet trucks, hand trolleys, and light equipment with rubber wheels**.

The **edge-free structure** promotes **greater freedom of movement**, allowing loading and unloading from both sides. The **1000 kg capacity at 1000 mm wheelbase** ensures suitability even for heavy loads, while the **non-slip walking surface** reduces the risk of slipping, increasing operator safety.

Equipped with an **aluminum tongue anchoring system**, the ramp can be easily fixed to various supports thanks to the **possibility of translation along the width** and rotation at the head. The **closing caps** prevent the tongue from coming out during use, making the ramp **removable yet stable**.

Purchase the **H1026_08 ramp!** The ideal choice for flexible, safe, and professional logistics.

Technical features:

- **Type:** removable ramp without edges
- **Material:** aluminum
- **Walking surface:** non-slip
- **Standard length (L):** 1991 mm
- **Internal width (A):** 940 mm
- **External width (B):** 1000 mm
- **Upright height (D):** 65 mm
- **Capacity:** 1000 kg at 1000 mm wheelbase
- **Unit weight:** 30 kg
- **Anchoring system:** adjustable aluminum tongue + head caps

User benefits:

- **Greater:** operational freedom thanks to the absence of edges.
- **Surface:** non-slip for maximum safety during use.
- **Easy:** to position and remove thanks to the lightness of aluminum.
- **System:** secure anchoring with translatable and rotatable tongue.
- **Ideal:** for logistics, events, and handling in dynamic spaces.

FAQ:

1. **Is this ramp compatible with pallet trucks and trolleys?**
   Yes, it is designed for use with hand pallet trucks and light trolleys with rubber wheels.
2. **Does it require a fixed installation?**
   No, it is removable and attaches with a movable aluminum tongue. No permanent installation required.
3. **Can I use it on surfaces that are not perfectly flat?**
   Yes, the anchoring system adapts to most flat platforms.
4. **Is there also a version with edges?**
   Yes, model H1026_07 has side edges to better contain the load.
5. **How much weight can it support?**
   It has a capacity of 1000 kg at 1000 mm wheelbase, suitable even for heavy loads in safety.

Mini buying guide:

Choosing a **ramp without edges** like the **H1026_08** means focusing on **versatility and operational speed**.

Thanks to the absence of side barriers, loading and unloading can be performed from any side of the platform.

The **aluminum structure** makes it light and easy to move, while the **high capacity** makes it suitable even in high-operability contexts.

The **intelligent fastening system** allows for safe and temporary installation, ideal for those working in logistics environments, trade fairs, warehouses, or the transport sector.

Loading ramp without edges H1026_08, aluminum logistics platform, non-slip ramp for pallet trucks, removable platform without edges, ramp for trolleys capacity 1000 kg.
