

10-seater bicycle rack h972_82

Bicycle rack for urban furniture made of 304 stainless steel, 10 double-sided spaces. Dimensions: W 200 x D 22 x H 30 cm.

The **10-seater bicycle rack H972_82** is the ideal solution for organizing bicycle parking in public, corporate, or residential spaces. Designed for **urban furniture**, it guarantees **functionality, order, and resistance to atmospheric agents**, becoming an essential accessory in outdoor areas such as schools, sports centers, condominiums, parks, companies, stations, and public offices.

Made entirely of **304 stainless steel**, this rack ensures **high durability, corrosion resistance, and low maintenance**, even in outdoor environments subject to rain, humidity, or salinity. The linear and compact design allows for **hosting up to 10 bicycles**, with the possibility of **single-sided or double-sided** use.

The **80 mm center distance** between the arches is designed to facilitate wheel insertion and keep the bikes firmly in place. The structure is ready to be fixed to the ground via **4 anchoring points of 14 mm** (fixings not included), guaranteeing stability and safety during use.

With a weight of **15.5 kg** and a length of **2 meters**, the rack is **robust but easy to handle during installation**. It is supplied ready for assembly and does not require special equipment, making it a practical and effective choice for those who wish to improve the cycling accessibility of public or private spaces.

Call to Action:

FAQ:

1. **Is it suitable only for public environments?**

No, the rack is also ideal for condominiums, companies, or schools.

2. **Is it resistant to rain and corrosion?**

Yes, thanks to the AISI 304 stainless steel, it is perfect for prolonged outdoor use.

3. **Are ground fixings included?**

No, the fixings must be purchased separately.

4. **What is its capacity?**

Its capacity is 10 bicycles.

5. **Can bicycles be parked from both sides?**

Yes, the design allows for single-sided or double-sided use based on the available space.

Mini purchase guide:

When choosing a **bicycle rack**, first of all evaluate **the capacity**: if you manage an area with high cycling traffic, such as schools or companies, a **10-seater double-sided rack** is a functional and space-saving choice.

The **materials** are fundamental: AISI 304 stainless steel offers **excellent resistance to weather and long life**.

Also check **the ground fixing methods**: in the case of the H972_82, it can be anchored via 4 points, ensuring optimal stability.

The **compact design** and 80 mm center distance make it suitable for different types of bikes, maintaining order and practicality.
