

10-space bike rack h972_153

10-space bike rack in galvanized steel, to be assembled and fixed. Dimensions: W 188.2 x D 40 x H 40 cm. Weight: 17 kg.

The **H972_153 bike rack** is a **professional 10-space rack**, ideal for organizing bicycle parking in **public and private environments** such as schools, companies, apartment buildings, sports centers, commercial areas, and urban spaces.

The structure is made entirely of **galvanized steel**, a material that guarantees **high resistance to rust, wear, and atmospheric agents**, making it perfect for **continuous outdoor use**. The practical and symmetrical design allows for **double-sided** parking, accommodating **5 bicycles per side** with a 55 mm distance between hoops to facilitate the insertion and stability of the wheels.

The bike rack is **supplied ready for assembly**, with pre-drilling for **ground fixing via 4 anchoring points**, ensuring maximum stability even in high-traffic contexts. With a **weight of 17 kg**, it combines solidity and practical handling.

The gray galvanized finish makes it **discreet and easily integrated** into any urban architectural context.

Ensure order and safety for bike parking with a durable and professional solution: choose the **H972_153 bike rack** or request a quote for large-scale installations.
