

1000 L IBC storage box h849_26

Steel storage unit for the storage of 1 x 1000 L IBC, featuring swing doors, lid, and ventilation louvres. Dimensions 135x165x196 cm.

The **IBC storage unit** is a structural solution designed for the safe storage of hazardous substances within industrial and logistical environments. Made entirely of high-thickness **steel** and finished with **RAL 2010 orange** industrial coating, the box is configured to accommodate one **1000-liter IBC**, protecting it from impacts, external agents, and unauthorized access. The combination of **front swing doors** and **top lid** allows for smooth operation both during IBC positioning and liquid extraction.

Technical features

- **External dimensions:** W. 135 x D. 165 x H. 196 cm
