

10L oxygen cylinder trolley h705_07

Stainless steel hospital trolley for safe transport of 10L oxygen cylinders, with strap and lockable wheels.

The trolley is designed for the safe transport of 10L oxygen cylinders within hospital environments and clinics. The fully welded structure in **40 x 30 mm polished stainless steel tubing** with a central column equipped with a fixed handle ensures stability and ease of maneuver during movement.

The **safety strap** and the **Ø 150 mm welded cylinder ring** keep the cylinder in a stable position during transport, minimizing risks of falling or damage. The base is equipped with **4 high-quality Ø 65 mm double plastic wheels**, two of which are equipped with a locking system, allowing the trolley to be stopped quickly when necessary.

Technical features

- Material: polished stainless steel
- Structural tube: 40 x 30 mm
- Compatibility: 10L cylinders
- Cylinder ring: Ø 150 mm, welded
- Integrated safety strap
- Wheels: 4 double plastic Ø 65 mm (2 lockable)
- Fixed handle on the central column
- CE certification
