

110-liter mobile pedal bin h20_108

Professional 110-liter pedal bin in painted metal. HACCP compliant, equipped with wheels and removable front for intensive use.

The **professional 110-liter pedal bin** represents a robust and reliable solution for waste management in high-activity environments. Built with an epoxy powder-coated metal structure, it ensures superior impact resistance and an easy-to-sanitize surface, making it ideal for industrial kitchens and the collective catering sector.

The design is optimized for operational functionality: the large-sized pedal control allows the lid to be opened without any manual contact, ensuring the maintenance of high hygiene standards. The presence of rubber wheels and the removable front significantly facilitates emptying and handling operations, reducing staff fatigue during the management of heavy loads.

Technical characteristics

- **Structure:** High-resistance epoxy powder-painted metal
- **Capacity:** 110 liters
- **Opening system:** Pedal control for hands-free use
- **Accessibility:** Removable front panel for easy bag replacement
- **Mobility:** Integrated Ø 95 mm rubber wheels
- **Bag security:** Perimetric bag-holding elastic included
- **Dimensions:** 480 mm (W) x 420 mm (D) x 965 mm (H)
- **Variants:** Available in different colors for color-coded waste collection
