

150-liter petrol tank h466_13

Mobile petrol tank h466_13 made of 150-liter polyethylene. Dimensions 977x582x460 mm. EX50 12V pump and ATEX 60P nozzle, ready for use.

The **150-liter petrol tank h466_13** is a mobile solution made of linear polyethylene, designed for the safe transport and dispensing of fuel in isolated operational contexts. Ideal for construction sites, farms, and greenery maintenance professionals, it solves the need to refuel machinery and light vehicles directly in the field, eliminating downtime for traveling to fixed stations. The structure ensures maximum logistical flexibility, being equipped with handles for lifting when empty and a base design for handling with forks when fully loaded. Equipped with a complete dispensing unit, including an EX50 12V pump, ATEX 60P automatic nozzle, and a solid hinged lid to protect the components, this tank ensures efficient and protected transfer in any work environment.

Technical features

- **Type:** Mobile tank for transport and dispensing of petrol
- **Nominal capacity:** 150 liters
- **Structure material:** Linear polyethylene with brass inserts
- **Overall dimensions (W x D x H):** 977 x 582 x 460 mm
- **Weight (with dispensing unit):** 35 kg
- **Loading cap:** 2" aluminum with integrated safety valve
- **Top protection:** Hinged lid
- **Handling systems:** Handles for empty lifting; setup for lifting and moving when full with forks
- **Pump model:** EX50 powered at 12 V
- **Dispensing hose:** 3/4" carbopress rubber, 4 meters long
- **Nozzle:** ATEX 60P automatic shut-off
- **Capacity control:** Level indicator
- **Wiring:** 4-meter cable for battery connection equipped with standard plug

Optional:

- **Flow meter:** for petrol tank
