

2-compartment PVC cage h601_38

Double veterinary cage in PVC on steel cabinet, L121xD72xH91.5 cm, for separate pet recovery.

The cage for veterinary centers represents an essential element for housing pets awaiting surgery or specific treatments. Thanks to the **double-compartment configuration**, it allows housing two patients in complete **physical separation**, avoiding direct contact between animals and reducing stress and cross-contamination risks.

The structure combines **practicality and hygiene**: the **PVC** cage is easily washable and disinfectable, while the **epoxy powder-coated steel** cabinet ensures resistance, stability, and durability over time, even in environments characterized by frequent cleaning cycles.

Technical characteristics

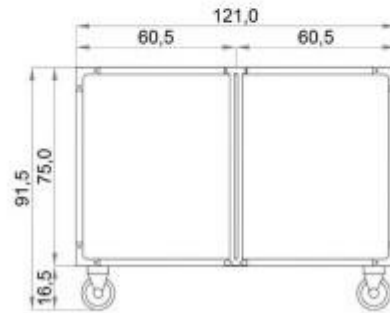

- PVC cage (double compartment for animal separation)
- Epoxy powder-coated steel cabinet
- Dimensions: **L121 x D72 x H91.5 cm**
