

2-meter barrier with reflective strip h503_05

2-meter road barrier with reflective strip.

Dimensions: L 2.00m x H 1.10m

This type of barrier is ideal for events and demonstrations, structured in hot-dip galvanized steel, ideal for making it stable. The 14 vertical profiles are made of Ø 16 mm tubular steel, while the vertical and horizontal tubes that create the frame of this barrier are made of Ø 33.7 mm tubular steel.

Technical features:

- Material: Galvanized steel
- Width: 200 cm
- Height: 110 cm
- Weight: 16 Kg
- With white and red reflective strip

INFORMATION

- **Material** metallo
- **advantages** con catarifrangente
- **Length in millimetres** 2000.000000
- **Height in millimetres** 1100.000000
