

2-seater bike rack for public spaces h1023_07

Stainless steel bike rack with crossbar and silicone protections. Dimensions: W 35 x D 6 x H 80 cm.

The **H1023_07 bike rack** is a compact, robust, and highly resistant solution, designed to offer **tidy and secure parking in public or private spaces**, with a capacity for **2 bicycles**. Thanks to its **double-sided design** and **V2A stainless steel** structure, it is ideal for installations in **urban areas, schools, offices, companies, outdoor parking lots, hotels, or residences**.

This rack is equipped with a **crossbar at frame height**, which allows the **bicycle to be secured to both the wheel and the frame**, thus offering **greater security against theft**. Unlike traditional solutions, this model includes **integrated silicone tubes**, which protect the bicycle from scratches or damage to the frame during parking.

The **welded and ready-to-use construction** makes installation simple and immediate, while **floor fixing via bolts** ensures **excellent stability** even in high-traffic areas. Furthermore, the **two-sided configuration** allows for a flexible arrangement of stations, adapting perfectly to large or small spaces.

Finally, **V2A stainless steel** guarantees **weather resistance, no maintenance requirements**, and a **long service life**, even in exposed environments such as squares, sidewalks, or schoolyards.

Choose the **H1023_07 bike rack** for a secure, durable, and elegant bike parking solution. Order now and optimize your public or private spaces!

FAQ:

1. **Is the rack suitable for outdoors?**
Yes, it is made of V2A stainless steel, ideal for withstanding the elements.
2. **How many bicycles can it hold?**
The model is designed for 2 bicycles, one per side.
3. **Is maintenance required?**
No, stainless steel does not require periodic maintenance.
4. **Can I fix it to any type of floor?**
Yes, it is sufficient that the floor is stable.
5. **Are the bicycles protected from scratches?**
Yes, thanks to the integrated silicone tubes, the frame is protected from abrasive contact.

Mini buying guide:

When choosing a bike rack for public spaces, it is essential to consider **resistance, practicality of use, and security**.

The **H1023_07** model is perfect for outdoor installations because it is built in **V2A stainless steel**, corrosion-resistant and maintenance-free.

The **crossbar** allows the bike to be fixed to the frame as well, deterring theft and increasing the stability of the parking.

The **protective silicone tubes** are a quality detail that avoids damage to bicycles, making it ideal even for users with valuable vehicles.

Being **ready to use and easily fixed to the floor**, it is an excellent choice for those who want to **manage bike parking in an orderly and elegant way**, while maintaining freedom in the arrangement of the modules.
