

2-seater bike rack for public spaces h915_09

Parking rack for 2 bikes in public spaces. Without lock. Dimensions: W. 400 x D. 460 x h. 906 mm.

Bike rack designed for installation along promenades, public spaces, parks, outdoor areas of shopping centers and shops. **Allows parking for 2 bicycles.** Thanks to the design of its **panels**, which feature a **groove** at the height of the bicycle pedal, the bikes remain stable once the pedal itself is inserted into the specific groove. The rack is complete with **2 compartments**. One of these is designed to store any helmet and child seat. **It does not include a lock.** The user must provide a padlock for locking the wheels and frame. Entirely made of steel with two-layer painting: epoxy primer and polyester paint for outdoors. **Color as per photo. Designed to be anchored to the ground.**

Technical features:

- Dimensions: W. 400 x D. 460 x h. 906 mm
- Number of spaces: 2
- Material: steel painted in 2 layers (epoxy primer and polyester paint for outdoor use)
- Color: as per photo
