

2-seater children's bench with planter h140_528

Creative 2-seater urban seating for children with integrated planter, made of galvanized steel. Dimensions: L. 87 x D. 60 x h. 90 cm.

The **bench with planter h140_528** is an urban furnishing accessory designed to combine **functionality, aesthetics, and fun** in public places dedicated to children.

The **heart of the seating** consists of a **cylindrical body in galvanized steel** with a thickness of 3 mm, which serves simultaneously as a **planter** and a **seating element**, with a unique and playful design thanks to the **laser cuts** in the shape of a **"smiley face"** that give a welcoming touch and stimulate children's creativity. Inside the cylinder is a **galvanized steel basin**, designed to house plants and create a perfect combination of nature and urban furniture. The base is composed of two **semi-circular seats in galvanized steel 2 mm thick**, with **seating surfaces in galvanized sheet metal** equipped with **rounded profiles**, to ensure safety and comfort during use.

The **internal basin** and the **seat frame** are **mouse grey RAL 7005**. The **body** and the **seat**, instead, are **zinc yellow RAL 1018**.

The materials are treated with **thermosetting powders**, ensuring long life and optimal protection against **atmospheric agents**.

This seat is perfect for parks, play areas, schools, and public spaces, transforming every environment into a welcoming and stimulating space, designed for the well-being and fun of children.

Discover how the **bench with planter h140_528** can make your public spaces dedicated to the little ones more colorful and functional. **Contact us for more information and personalized quotes.**

Technical characteristics:

- **Dimensions:** L. 87 x D. 60 x h. 90 cm
- **Number of seats:** 2 (semi-circular seats)
- **With planter**
- **Weight:** 61 kg

- **Durability:** made of galvanized steel and painted with thermosetting powders to resist atmospheric agents.
- **Stimulates socialization:** the 2-seater bench encourages interaction and play between children.
- **Easy to fix:** preparation for ground fixing guarantees stability and safety.

FAQ:

1. **What materials are used for the bench?**

The bench is made of galvanized steel treated with thermosetting powders for resistance and durability.

2. **How many seats does the bench offer?**

The bench is designed to comfortably accommodate two children.

3. **Is it suitable for outdoor use?**

Yes, the materials and surface treatment make it perfectly resistant to atmospheric agents.

4. **How is the bench fixed to the ground?**

It is prepared for fixing via anchor bolts and expansion plugs (not included).

5. **Can the basin be used for any type of plant?**

Yes, it is designed to house decorative plants that can enrich the urban environment.

Mini buying guide:

Opt for a children's bench with a planter in **galvanized steel** if you are looking for a robust and durable urban accessory. The design with **laser cuts** and bright colors stimulates **creativity** and **social interaction**. The presence of the **integrated basin** allows you to add a touch of green to public spaces, while the **materials treated with thermosetting powders** guarantee protection against atmospheric agents. Evaluate the preparation for **ground fixing** to ensure stability and safety.
