

2-seater swing for playground h749_15

Double swing with aluminum posts and rubber seats, dimensions 349x159x242 cm, ideal for public parks and wear-resistant play areas.

The **h749_15** swing represents a durable and safe solution for setting up outdoor play spaces subject to intensive use. Designed to be integrated into playgrounds, public gardens, kindergartens, and play centers, this structure combines the lightness and corrosion resistance of aluminum with the solidity of the steel crossbar. The design is enhanced by two-tone HDPE decorations that make the equipment visually stimulating for children, while ensuring maximum compliance with safety standards for collective use.

Technical features

- **Overall dimensions:** L.349 x D.159 x h.242 cm
- **Vertical structure:** posts made of high-resistance aluminum
- **Upper crossbar:** galvanized steel for optimal structural stability
- **Suspensions:** 2 pairs of stainless steel chains resistant to atmospheric agents
- **Seats:** 2 board seats with aluminum inner core and anti-trauma rubber outer coating
- **Decorative elements:** 19 mm two-tone HDPE panels
- **Age target:** suitable for children from 3 to 14 years old
- **Safety:** Free Fall Height (FFH) equal to 118 cm
- **Capacity:** designed for 2 simultaneous users
- **Space requirements:** minimum safety area required of 19 sqm
