

2-section examination couch with adjustable backrest +80° h725_27

Professional painted steel couch for examinations and massages, fixed height 80 cm, +80° gas spring backrest and certified fireproof coating.

The **h725_27 couch** is a two-section medical device designed to combine structural stability and operational versatility in health and therapeutic settings. Featuring a fixed height of 80 cm, this model offers a solid workstation, ideal for clinical examinations, physiotherapeutic treatments, and massage therapy sessions requiring a firm and resistant support base.

The technical configuration is based on a high-quality **painted steel frame**, capable of supporting intense workloads. The upper surface is divided into two segments, with a **backrest adjustable in proclivious mode up to +80°** via a gas spring system, allowing the operator to set the patient's posture with precision and minimal physical effort. Safety is guaranteed by compliance with fire prevention regulations, thanks to the use of **class 1IM fireproof** padding and upholstery, available in various color variants for integration into any professional layout.
