

2-section wooden massage table adjustable height h930_51

Professional wooden massage table with beech finish, 2 sections with 45° tilting backrest, adjustable height 55-83 cm and 150 kg load capacity.

The **h930_51 massage table** is a professional two-section support designed to ensure maximum stability and comfort during physiotherapy, medical, and holistic treatments. The load-bearing structure is made of **wood with a beech finish**, a solution that combines mechanical strength and a warm aesthetic, ideal for medical practices and wellness centers seeking a coordinated and professional design. The work surface features a **thickness of 105 mm**, ensuring solid support and optimal patient reception.

The two-section configuration includes a **backrest tilting up to 45°**, allowing the operator to vary the patient's posture according to the specific massage or therapy technique. Thanks to the **adjustable height system at intervals between 55 and 83 cm**, the table allows for ergonomic customization of the workstation, reducing operator muscle fatigue during prolonged sessions.
