

2-station trampoline with corridor h1018_04

Double trampoline with side corridor and galvanized structure for professional use. Dimensions: 346 x 604 x H 352 cm.

The **h1018_04 2-station trampoline with side corridor** is a professional solution for recreational areas, designed to offer **maximum safety, resistance and fun** in high-traffic public environments such as **playgrounds, schools, shopping centers and campsites**.

The structure is built with a **hot-dip galvanized frame**, which guarantees **high resistance to corrosion** and atmospheric agents, making it ideal also for outdoor installations and in marine or humid areas.

Each jumping area measures **180 x 180 cm** and is equipped with **pre-galvanized steel tension springs** (length 27 cm, Ø 3 cm), combined with **reinforced nylon jumping mats**, in yellow, designed to provide a dynamic but controlled bounce.

The entire structure is protected by a **perimeter safety net** with a 4x4 cm square mesh, made of **soft and ultra-resistant yarn**, which prevents accidental exit during activity. The edges are equipped with **fire-retardant PVC cushions**, padded with **10 cm high-density foam**, to protect against impacts against the structure.

A distinctive element of this model is the **side access corridor**, made of **treated outdoor wood and covered with a protective cushion**, which allows for an orderly and controlled entry to the two stations. Access to the platform is via a **metal ladder with treated wood steps**, dimensions 180 x 80 cm, robust and anti-slip. **Upon request and subject to a quote**, it is possible to receive **assembly service** and **provision of the ministerial code** for installation in public spaces.

The bottom of the structure is enclosed by a **lower aesthetic screen** in metal mesh, covered with fire-retardant PVC. Supplied with **installation, use, and maintenance manual and activity logbook**, this trampoline is covered by **1 year of standard international warranty**.

Choose the **h1018_04 trampoline** for a professional and safe installation. Ideal for public entities, tourist facilities and play areas. Contact us for a personalized quote.

Technical features:

- **Number of stations:** 2 in line

FAQ:

1. **Is the trampoline suitable for outdoor use?**

Yes, thanks to the galvanized structure and treated materials, it is perfect for year-round outdoor installations.

2. **Does the corridor guarantee safe access?**

Yes, the side corridor with wooden flooring and protective cushion allows for an orderly and safe entry.

3. **Is it suitable for intensive use in public places?**

Absolutely yes. It is designed for continuous use in high-traffic contexts, such as shopping centers and public parks.

4. **Is it possible to obtain certification for public use?**

Yes, upon request and subject to a quote, we provide the ministerial code necessary for homologation in public environments.

5. **Is assembly included?**

Assembly is not included, but can be requested upon quote.

Short purchase guide:

The h1018_04 model is the ideal solution when you want to install a **professional trampoline for multiple users** while maintaining **regulated and controlled access**.

The **side corridor** represents added value in terms of safety management, making it perfect for **public parks, recreation centers and schools**.

Compared to models without a corridor, it ensures **better organization of access** and adapts to contexts where **user flow supervision** is necessary.

2-station trampoline with corridor, professional trampoline, trampoline with safety net and ladder, trampoline for public parks, galvanized outdoor trampoline, certified play equipment.
