

2-step stool for medical offices h564_68

2-step medical stool, chrome-plated steel structure, non-slip surfaces, 150 kg capacity, ideal for clinics and medical offices.

The step stool is a specific aid for medical offices and clinics, designed to facilitate patient access to examination couches and visit stations. It allows overcoming height differences safely, reducing the risk of falls and fatigue, especially for patients with reduced mobility, the elderly, or pregnant women.
