

## Medical step stool 2 steps h13\_122

Two-step medical step stool, chrome-plated steel, non-slip platform, 90 kg capacity, dimensions 40x53xh.44 cm, Italian production.

The **medical step stool** is an essential device in clinics and medical practices to facilitate the safe access of patients to the examination couch. Made with a **chrome-plated tubular steel structure**, it guarantees stability and resistance over time, while the **rubber feet** ensure a stable anchoring to the floor and protection of surfaces. The **non-slip grey plastic platform** on both steps prevents accidental slips, a critical element in healthcare environments where patient safety is a priority. Designed to facilitate getting on and off the couch, it reduces the risk of falls and improves accessibility for patients with reduced mobility or the elderly. The construction is certified as Italian production.

## Technical features

- Structure: chrome-plated tubular steel
- Number of steps: 2
- Platform: non-slip grey plastic material
- Feet: rubber
- Maximum capacity: 90 kg
- Dimensions: 40 × 53 × h.44 cm
- Production: Italian
