

20 L hot water dispenser h83345

20-liter stainless steel hot water dispenser, 2500W. Temperature: 30-110°C, rapid heating and drip-proof tap for professional catering.

The **h83345 hot water dispenser** is a high-capacity professional appliance, ideal for managing large volumes of hot drinks in catering and banqueting contexts. With a 20-liter tank and a power of 2500W, this dispenser ensures rapid heating times (20-30 minutes) and a constant temperature for serving tea, herbal teas, or mulled wine to large groups. The structure is made of high-quality **stainless steel**, complemented by heat-insulated plastic handles and knobs for safe handling even when fully loaded. The system is equipped with an analog temperature regulator and a practical external level indicator, which allows monitoring the amount of remaining water without having to open the lid, thus maintaining the thermal efficiency of the product.

Technical features

- **Maximum capacity:** 20 Liters
- **Power:** 2500 W
- **Power supply:** 230V / 50Hz / 1 phase
- **Temperature range:** Adjustable from 30°C to 110°C
- **Heating time:** 20-30 minutes
- **Body material:** Stainless steel
- **Component material:** Heat-insulating plastic for handles and lid
- **Dimensions:** W31 x D31 x H52.3 cm
- **Net weight:** 3.6 kg
- **Safety:** Integrated overload protection and non-slip rubber feet
- **Dispensing:** Rapid drain tap for filling cups
- **Monitoring:** External level indicator and temperature reached indicator light
