

20 m floating pool divider h1009_14

20 m floating pool divider h1009_14 for FINA pools with Ø120 mm PP disks and Ø 6 mm AISI316 stainless steel cable. For competitions and training.

The **Floating 20 m pool divider h1009_14** is a technical element for 20-meter swimming facilities, designed and manufactured in compliance with FINA facility rules for use in both competitions and training. This device addresses the operational need to dampen wave motion and contain turbulence in the pool generated by swimming, ensuring constant hydrodynamics and optimal competition or sports practice conditions. Aimed at aquatic center managers, sports facility managers, and competition organizing committees, the divider consists of 120 mm diameter disks (15 per meter) in top-quality polypropylene (PP) with additives to ensure high resistance to chemical and atmospheric agents. The structure of the 20 m line is assembled on a Ø 6 mm plastic-coated AISI316 stainless steel cable and is integrated with high-density polyethylene PE-HD floating balls (6 per meter). The article is supplied in standard colors blue, red, and white, with the possibility of requesting other colors upon quotation.

Technical features

- **Type and compliance:** Floating divider suitable for competitions and training, manufactured in compliance with FINA facility rules
- **Lane length:** 20 m
- **Disk material:** Top-quality polypropylene (PP) with additives for high resistance to chemical and atmospheric agents
- **Disk dimensions and density:** Diameter Ø 120 mm (15 disks per meter)
- **Disk geometry:** Designed to reduce turbulence
- **Assembly support:** Ø 6 mm plastic-coated AISI316 stainless steel cable
- **Floats:** PE-HD floating balls (6 per meter)
- **Standard colors:** Blue, red, white
- **Optional colors:** Other colors available on request and upon quotation
- **Stainless steel springs and tensioners** (on request and upon quotation)
