

200-liter drum heater jacket h923_19

Professional drum heater jacket h923_19 for 200-liter drums. 650 W power, integrated adjustable thermostat and silicone-coated fiberglass insulating coating.

The **200-liter drum heater jacket h923_19** is a professional drum heating system, developed to meet the needs of **industrial operators, employers, workshop managers, laboratory technicians, and chemical or artisanal plant managers**. This device responds to the need to keep materials stable that require a constant temperature during winter, or that must never fall below certain critical temperatures. The module solves the operational problem of **preserving the fluidity and integrity of substances stored in containers, allowing the user to calibrate the thermostat based on timing, the characteristics of the container material, and the internal fluid thanks to a fixed radiant core**. Entirely produced in Italy, the jacket consists of a high-tenacity external synthetic coating and internal glass-silicone insulating layers that allow it to adhere perfectly to the surface to be heated while resisting high temperatures. All electrical parameters, details on construction materials, and physical dimensions are available in the official technical documentation.

Technical characteristics

- **Product type:** heating jacket for 200-liter drums
- **Code reference:** h923_19
- **Power supply:** 230 V AC
- **Nominal power consumption:** 650 Watt
- **Thermostat configuration:** built-in on board and adjustable from 0 to 150°C (the internal temperature adjustment operating range varies from 0 to 90°C based on parameters set by the user)
- **External coating material:** Cordura / Nylon (synthetic material, very resistant and durable even in the most extreme conditions)
- **Internal insulating material:** fiberglass fabric insulation layer to which the heating element is fixed
- **Closing and contact layer:** fiberglass fabric coated in silicone rubber (glass-silicone), ideal for adhering perfectly to the drum or pallet
- **Overall dimensions:** height (H) 800 mm x circumference 1990 mm
- **International Protection rating (IP):** IP 40
- **Power cable specifications:** 3-conductor silicone cable without plug, 3 meters long
- **Top lid configuration:** NO
- **Manufacturing and origin:** all processing is performed in Italy
