

25-liter chemical spill kit h104318

25-liter chemical spill kit in a nylon bag with shoulder strap, 50x60x15 cm. Absorption 42 liters, compliant for transport vehicles.

The **25-liter chemical spill kit** (model h104318) is a professional emergency solution configured in a practical nylon bag equipped with a shoulder strap and transparent PVC window. Specifically designed for **hauliers, logistics companies, laboratories, and industrial departments**, this kit is aimed at safety managers and drivers who must manage emergencies related to hazardous substance leaks. The system solves the operational problem of **immediate containment and rapid remediation** directly at the source, preventing the dispersion of chemical fluids into the environment. Thanks to its compact size, the setup is easily adaptable to transport vehicle cabins, allowing full compliance with current regulations regarding **the safety of transporting hazardous materials** (ADR regulations).

Technical specifications

- **Nominal capacity:** 25 liters
- **Minimum absorption capacity:** 42 liters
- **External dimensions (LxDxH):** 50x60x15 cm
- **Total weight:** approx. 5 kg
- **Outer container:** nylon bag with shoulder strap for transport and transparent PVC window
- **Absorbent pads included:** 25 pads with dimensions 41x46 cm
- **Absorbent socks included:** 2 socks with diameter $\varnothing$ 7.6 cm and length 122 cm
- **Absorbent pillows included:** 2 pillows with dimensions 25x25 cm
- **Personal protective equipment for hands:** 1 pair of nitrile gloves
- **Personal protective equipment for eyes:** 1 pair of protective goggles
- **Waste storage systems:** 1 waste disposal bag
- **Auxiliary systems for residues:** 2 waste disposal bags
- **Specific intended use:** absorption of aggressive and hazardous chemical liquids
