

3-channel cable protector ramp h328_46

Rubber cable protector ramp with 3 channels Ø 50 mm and visible yellow lid. Dimensions: L 900 x W 500 x H 70 mm.

The **3-channel cable protector ramp H328_46** is designed to offer **temporary, robust, and visible protection** to cables and pipes during **outdoor events, trade fairs, festivals, and local events**. Its structure ensures **safety for people** and **mechanical protection against accidental compression**, allowing for an orderly and safe passage even in high-pedestrian-traffic areas.

The base is made of **black vulcanized rubber**, while the top lid is in **high-visibility yellow polyethylene** to highlight the presence of the cable protector and reduce the risk of tripping. Thanks to the **3 channels of Ø50 mm**, it can contain **up to three large-diameter cables or pipes**, ensuring separation, order, and protection.

Equipped with **reinforced hinges**, **anti-oxidation nylon connection rods**, and **lateral handles** to facilitate transport, H328_46 is modular and easy to install: each module is equipped with an **interlocking locking system**, which ensures cohesion between the elements. Furthermore, it features **4 holes for floor fixing**, should a more stable and lasting installation be desired.

It is suitable for use in **private areas closed to public traffic**, on **asphalt, concrete, or gravel**, but it is **not suitable for the passage of vehicles**, nor for use in industrial environments or with forklifts.

Make your events safer and more organized! Order the **H328_46 cable protector ramp** now or request a quote for multiple supplies.

Technical characteristics:

- **Base material:** vulcanized rubber
- **Lid material:** yellow polyethylene
- **Connection rods:** in nylon (anti-oxidation)
- **Color:** black/yellow
- **Length:** 900 mm
- **Width:** 500 mm
- **Height:** 70 mm
- **Number of channels:** 3
- **Maximum cable/pipe diameter:** Ø50 mm
- **Weight:** 17.20 kg
- **Connection system:** interlocking
- **Lateral handles:** yes
- **Reinforced hinges:** yes
- **Fixing holes:** 4 per module
- **Recommended use:** events, festivals, trade fair areas – private areas only
- **Not suitable for:** vehicular passage, forklifts, intensive industrial use

User benefits:

- **Protection:** effective for large cables.
- **High:** visibility thanks to the yellow lid.
- **Installation:** simple modular with interlocking joints.
- **Transport:** easy thanks to the integrated handle.

- **Fixable:** to the ground for greater stability.

FAQ:

1. What cables can it contain?

Up to 3 cables or pipes with a maximum diameter of 50 mm.

2. Is it driveable?

No, it is intended only for pedestrian use in private areas closed to traffic.

3. Is it suitable for outdoor environments?

Yes, it can be placed on asphalt, concrete, or gravel.

4. Is equipment needed to install it?

No, it easily connects with interlocking joints and can be fixed to the ground using the integrated holes.

5. Is it possible to remove it quickly after the event?

Yes, thanks to the lateral handle and modular system, removal is quick and without tools.

Mini buying guide:

For **securing large-diameter cables** in temporary contexts such as fairs, events, and festivals, cable protector ramps offer a **practical and visible alternative** to bulkier systems.

The H328_46 model is ideal for **managing up to 3 wiring lines**, with the possibility of **fixing it to the ground or removing it quickly**.

It is not suitable for industrial or vehicular uses, but it guarantees **excellent protection in private pedestrian contexts**.

3-channel Ø50 mm cable protector ramp, cable protection for temporary events, black-yellow interlocking cable bridge, cable cover for events and fairs, 3-way floor cable duct for events, non-driveable pedestrian cable protection, high-visibility modular cable protectors.
