

3-compartment recycling container with flaps h719_11

Set of 3 indoor waste recycling containers with included self-adhesive colored protect-pads and automatic closing flaps. Capacity: 3 x 45 lt.

Indoor waste recycling container with reduced depth, ideal for placement even in tight spaces. The construction material, **high-quality powder-coated galvanized steel sheet**, makes the entire structure very **resistant**. The **3 compartments** are perfect for separating different types of waste, identifiable thanks to the presence of **highly resistant and self-adhesive protect-pads** in blue, yellow, and anthracite colors to be positioned independently on the **flaps**. The latter are equipped with gas springs that allow **slow automatic closing**. For each compartment, there is a **tilting galvanized internal container** for removing waste bags. On the front of the structure, **3 hinged doors** are closed with a **square key lock**, supplied as standard. **2 adjustable feet** in the front part make the recycling station stable even on uneven surfaces. **Wall mounting** is recommended even if the structure is installed on the floor. **Self-extinguishing and non-flammable**.

Technical features:

- Dimensions: h 1000 x w 1200 x d 300 mm
- Material: high-quality galvanized steel sheet, powder-coated
- Capacity: 3 x 45 lt
- Number of compartments: 3
- 3 tilting forward galvanized steel internal containers for bag emptying
- 3 hinged doors
- Key lock with key supplied as standard
- Adjustable front feet
- Flaps with gas springs and automatic closing
- Structure color: light grey RAL 7035
- Set of resistant self-adhesive protect-pads in yellow, blue, and anthracite grey
- Wall mounting
- DIN 4102, fire protection class A1
- Self-extinguishing, certified - -TÜV/GS
- Guaranteed solidity and resistance
- Warranty: 5 years
