

3-compartment waste recycling bin h413_93

Waste recycling container for indoor use. Capacity: 3 x 40 lt. Material: stainless steel.

Waste bin for indoor use, ideal for installation in public places such as airports, stations, shopping malls and offices. It ensures proper waste separation as it is divided into **3 compartments of 40 lt each** and each is provided with an internal bag holder. The structure is made entirely of **stainless steel**, ensuring resistance and ease of cleaning.

Technical features:

- Dimensions: W.60 x D.30 x H.67 cm
- Capacity: 3 x 40 lt
- Material: stainless steel
- Bag holder ring in each compartment
- Emptying by opening the lids and extracting the bag (bag not included)

****N.B.:** when ordering, please indicate the desired label type ([see image](#)). If not specified, labels will be provided as shown in the image.
