

3-seater rocker toy for nursery school h821_10

Collective plastic rocker for 3 children, 120x38x54 cm. Structure with rounded edges and safety handles for school contexts. The three-seater plastic rocker is a solution designed to promote social interaction and coordinated play in educational and recreational environments. The structure is designed to ensure intensive use in total safety, integrating ergonomic elements that facilitate grip and correct positioning of the lower limbs during rocking. Thanks to the absence of sharp edges and the use of resistant materials, the rocker meets the durability and protection needs required in collective facilities.

Technical features

- **Dimensions:** W. 120 x D. 38 x H. 54 cm
