

3-station trampoline with corridor h1018_05

Professional 3-station in-line trampoline, with access corridor. Dimensions: 568 x 862 x H 352 cm.

The **H1018_05 3-station trampoline with lateral corridor** is the ideal solution for **shopping malls, resorts, campsites and high-traffic play areas**, where **maximum safety, operational capacity and long-term durability** are required.

Designed for professional installations, it features a **robust hot-dip galvanized steel structure**, capable of withstanding the most extreme weather conditions, guaranteeing **reliability and long life even in marine or humid environments**.

Each jumping area measures **380 x 180 cm** and is equipped with **27 cm pre-galvanized steel springs**, combined with **high-rebound yellow reinforced nylon elastic nets**, designed to offer a smooth and safe jumping experience.

The **lateral access corridor**, built with **outdoor-treated wooden planks** and covered with a **protective cushion**, allows for an orderly and supervised entry by operators. The entire structure is protected by **perimeter nets with 4x4 cm square mesh**, made of **ultra-resistant soft thread**, designed to prevent accidental falls.

The **protective cushions** in **fire-retardant PVC**, with **10 cm high-density foam padding**, cover all rigid areas of the structure, offering additional safety. The **lower aesthetic net** is composed of metal mesh coated in fire-retardant PVC, while access is via a **metal ladder with treated wooden steps**, dimensions 180 x 80 cm.

Complete with **installation manual, use and maintenance booklet and activity log**, the trampoline is supplied with a **1-year international warranty**.

Trust the **H1018_05 trampoline** to offer a safe and engaging experience in your shopping center or recreational facility. Contact us for a custom quote and info on professional installation.

Technical features:

FAQ:

1. **How many people can use the trampoline at the same time?**

The H1018_05 model has 3 independent stations, which can be used simultaneously by 3 users.

2. **Is it suitable for outdoor use all year round?**

Yes, thanks to the hot-dip galvanized frame and resistant materials, it is designed to withstand any weather condition.

3. **Is assembly included?**

No, but we can provide assistance and a quote for professional assembly upon request.

4. **What is the function of the corridor?**

The lateral corridor facilitates the regulated entry of users, increasing safety and improving operational organization.

5. **Is specialized personnel required for installation?**

Installation can be carried out by following the technical manual provided, but it is recommended to rely on qualified technicians to ensure maximum safety.

Mini buying guide:

The **H1018_05 3-station trampoline** represents the ideal choice for facilities with a **high flow of users**, where it is necessary to manage multiple children simultaneously in safety.

Thanks to the **protected access corridor**, it is perfect for contexts such as **shopping malls, public play areas, schools or resorts**, where entry control is essential.

Compared to one or two-station models, it allows for increased system efficiency without compromising on safety.

3-station trampoline with corridor, professional trampoline, galvanized trampoline for playgrounds, shopping mall trampoline, three-station trampoline, certified outdoor play equipment.
