

3-step medical clinic step stool h564_67

Three-step medical step stool in chrome-plated steel with rubber feet. Non-slip structure with 150 kg capacity, dimensions 400x690xh.440 mm.

The medical clinic step stool is an indispensable tool for facilitating access to examination tables, dental chairs, and diagnostic equipment. This solution combines structural robustness and safety of use, meeting the specific needs of doctors and patients during clinical procedures. The pyramid step design ensures stability and comfort during positioning and access, reducing the risk of slipping and falling.

Technical features

- Structure: **chrome-plated steel** tubular
- Steps: **3 plastic steps**
- Surface: **non-slip**
- Feet: rubber
- Maximum capacity: **150 kg**
- Dimensions: **400 × 690 × h.440 mm**
