

3-tier veterinary hospitalization cage h601_21

Vertical animal hospitalization box in AISI 304 stainless steel, 3-tier, with braking wheels. For veterinary clinics and surgeries.

The box for animal hospitalization is one of the essential elements for veterinary clinics and surgeries. Designed to house pets during hospitalization periods, it allows for efficient space organization thanks to its **vertical 3-tier structure**.

The construction in **AISI 304 stainless steel** guarantees high impact resistance and compliance with current hygiene and health regulations. This material allows for **simple and complete disinfection**, effectively reducing bacterial and viral load. The vertical configuration allows for adding further cages in the same room, multiplying the available hospitalization places without requiring additional space.

The **conductive wheels with electromagnetic staticity function**, 2 of which are equipped with brakes, allow for easy transport from one environment to another, ensuring stability during movement.

Technical features

- Material: AISI 304 stainless steel
- Configuration: 3 tiers
- Wheels: conductive for electromagnetic staticity, 2 braking
- Dimensions: W. 60.5 × D. 72 × H. 198 cm
