

30 cm soft foam ramp h999_10

Non-slip foam ramp. Dimensions: W. 60 x D. 60 x H. 30 cm. For children from 18 months to 3 years.

The **30 cm soft foam ramp** is an essential element in psychomotor paths intended for **children from 18 months to 3 years**, designed for educational environments such as **nurseries, pre-nursery classes and kindergartens**.

Made of **high density foam (25 kg/m³)**, it guarantees an excellent balance between **softness and support**, offering a safe surface for climbing, descending and motor control exercises. The **leather-effect PVC** coating is **bite-resistant, antibacterial** and **easily washable**, while the **non-slip** base ensures maximum stability on any type of floor.

The inclined shape and the height of 30 cm are designed to **stimulate balance, motor coordination and spatial perception** in total safety. It can be used individually or integrated with other soft modules to create **progressive and personalized motor paths**.

Available in **different bright colors**, it **complies with all European regulations** regarding safety for early childhood. A perfect choice to promote motor development in a structured, safe and engaging educational context.

Add the 30 cm ramp to your psychomotor path! Contact us for tailor-made solutions and quotes for school supplies.

Technical features:

- **Dimensions:** 60 x 60 x 30 cm
- **Height:** 30 cm
- **Internal material:** High density foam 25 kg/m³
- **Coating:** Leather-effect PVC, antibacterial, bite-resistant
- **Base:** Non-slip
- **Color:** Available in different colors
- **Recommended age:** From 18 months to 3 years
- **Certifications:** Complies with European safety regulations
- **Usage:** Indoor – educational environments, nurseries, kindergartens
- **Cleaning:** Easily washable with a cloth and neutral detergents

User benefits:

- **Supports development:** of balance and motor coordination.
- **Promotes:** autonomy in the movements of the little ones.
- **Structure: safe and stable:** even on smooth surfaces.
- **Materials: resistant:** hygienic and safe for daily use.
- **Perfect for creating: personalized modular paths.**

FAQ:

1. **What is the recommended age for this ramp?**
It is ideal for children from 18 months to 3 years.
2. **Can it be used in small spaces?**
Yes, with a base of 60 x 60 cm, it is compact and easily fits even in environments with limited space.

3. **Is it stable on all types of flooring?**

Yes, the non-slip base guarantees stability even on smooth surfaces.

4. **Is the coating safe for children?**

Yes, it is bite-resistant, antibacterial and complies with European regulations.

5. **Does it require assembly or does it arrive ready to use?**

The product is delivered already assembled and ready for immediate use.

Mini buying guide:

In the 18 months – 3 years range, the primary objective is to stimulate **autonomous motor development**, in safety. Products like the 30 cm soft ramp are fundamental tools to encourage **climbing and descending**, **coordination**, **balance** and **autonomy** in movements.

Small-sized ramps are ideal for children learning to manage their bodies in space. The inclined surface facilitates progressive exercises, increasing **confidence in movements** and postural control.

The choice of antibacterial, bite-resistant and easy-to-clean materials is essential to ensure maximum **hygiene and safety** in environments like nurseries and kindergartens. The structure must also be **stable and non-slip** to avoid shifting during use.

The ramp can be used alone or combined with other psychomotor modules to create **dynamic**, variable and personalized paths, promoting active play and motor learning.

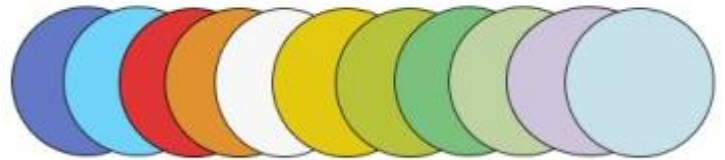

An effective investment for any educational space that desires professional, safe and pedagogically valid material.
