

3x3 m floating module platform h759_03

Jetty composed of high-density polyethylene (HDPE) floating modules. Available in multiple colors. Total dimensions: 3 x 3 m.

Platform structured with floating modules, made of high-density polyethylene (HDPE). The structure, measuring **3 x 3 m**, includes a **stainless steel ladder** and **2 stainless steel anchoring kits/eyebolts**. **Easily assembled and disassembled**, it features **high buoyancy**, specifically **350 kg/sqm**. Thanks to the presence of individual blocks, it is possible to compose floating structures of different shapes. The construction material guarantees **high resistance to multiple factors**: seawater, salt, atmospheric agents, acids, UV rays, and accidental impacts. In fact, in the event of accidental breakage of a floating module, the stability and buoyancy of the platform are never compromised. Furthermore, this product is TUV certified with maximum buoyancy and is tested for installations in open sea, coastal areas, lakes, and rivers, up to waves of 150 cm (depending on the anchoring). The floats are connected to each other using special **polyethylene interlocking connectors**. The **surface is non-slip** and there are **no sharp corners or edges**. **Seabed anchoring**. The modular platform is the perfect and versatile system for creating **floating areas for leisure, solariums, jetties starting from the shore, and work platforms**.

Technical features:

- Platform dimensions: 3 x 3 m
- Composed of floating modules
- Suitable for multiple uses
- Module material: high-density polyethylene (HDPE)
- 100% recyclable
- 1 stainless steel ladder
- 2 anchoring kits/eyebolts
- Fast assembly and disassembly
- Buoyancy: 350 kg per sqm single layer
- Resistant from -55° to +75° without undergoing deformation or alteration
- Resistance to salt, seawater, UV rays, acids
- High resistance and elasticity for accidental impacts
- Absence of sharp corners
- Seabed anchoring
- Low maintenance
- TUV certification for maximum buoyancy
- Available in various colors

**It is possible, upon request for a quote, to order the product in different sizes.*
