

4-color folding mat h999_34

4-color folding mat (200x200x4 cm) in PE-30 foam and M2 fire-retardant PVC coating. Safe space-saving solution for schools and gyms.

The **4-color folding mat h999_34** developed by Sumo Didactic is a professional anti-trauma surface designed for psychomotricity activities and gymnastics. Aimed at schools, kindergartens, and sports centers, this support effectively solves the problem of space optimization within small gyms or multi-purpose facilities, where different disciplines alternate in the same environment. The foldable design guarantees a versatile and space-saving solution, while the high-density PE-30 polyurethane foam core ensures optimal comfort and maximum protection during motor activities. The PVC polyester coating, completely phthalate-free and certified as M2 fire-retardant, meets the strictest safety and hygiene requirements for intensive use in children's and sports contexts.

Technical specifications

- **Type:** Folding mat (tatami) for psychomotricity and gymnastics
- **Dimensions open (L x W x H):** 200 x 200 x 4 cm
- **Coloring:** 4 integrated colors
- **Internal material:** High-density PE-30 polyurethane foam
- **Coating material:** PVC polyester
- **Chemical specifications:** Phthalate-free
- **Fire safety:** Class M2 fire-retardant certification
- **Manufacturer:** Sumo Didactic
