

4-seater bicycle rack for public spaces h1023_11

Double-sided rack with anti-theft eyelets and protective supports. Dimensions: W 108 x D 120 x H 85.6 cm.

The **H1023_11 bicycle rack** is a professional and highly resistant solution for the **secure and orderly parking of 4 bicycles** in public and corporate spaces. Designed to withstand intensive use and atmospheric agents, it is perfect for **schools, stations, company parking lots, commercial areas, condominium spaces** or **urban installations**.

The structure is **self-supporting and bolted**, made of **tubular steel** and supplied in an **assembly kit with brackets included** for floor fixing. The **double-sided** configuration allows bicycles to be parked on both sides, optimizing space and ensuring a **total positioning depth of 3200 mm**.

The heart of the system is the **diagonal support coated in red plastic**, designed to support the bike frame and prevent impacts or twists, protecting rims and frame even on high-end models, including E-Bikes. The **integrated steel eyelets** allow the use of chains or padlocks for secure anchoring, complying with the **DIN 79008:2016-05 point 7.2** standard on anti-theft protection.

Thanks to the **500 mm spacing between supports**, this rack is compatible with **bicycles with tires up to 55 mm wide**, ensuring comfort and ease of access even in very busy environments.

Buy the **H1023_11 bike rack** and guarantee safe, orderly, and durable parking for public and private users. Perfect for serial installations.

Technical features:

- **Capacity:** 4 bicycles
- **Configuration:** Double-sided (parking on both sides)
- **Material:** Steel
- **Construction type:** Self-supporting, bolted, in assembly kit
- **Color:** Silver
- **Weight:** 27.70 kg
- **Mounting:** Floor (brackets included)
- **Supports:** Diagonals with red plastic coating
- **Anti-theft eyelets:** Yes, integrated
- **Distance between bicycles:** 500 mm
- **Supported wheel width:** Up to 55 mm
- **Space required (depth):** 3200 mm
- **Dimensions:** W 108 x D 120 x H 85.6 cm
- **Regulation:** Compliant with DIN 79008:2016-05 point 7.2

User benefits:

- **Parking:** on both sides to optimize space.
- **Security:** anti-theft guaranteed thanks to integrated eyelets.
- **Protection:** of the frame with red plastic coatings.
- **Suitable:** also for bicycles with tires up to 55 mm wide.

FAQ:

1. **How many bicycles can it accommodate?**
Up to 4 bicycles, with a double-sided configuration.
2. **Is it suitable for E-Bikes or large bicycles?**
Yes, the 500 mm spacing and wide supports make it compatible with E-Bikes as well.
3. **Does the structure comply with regulations?**
Yes, it complies with the DIN 79008:2016-05 point 7.2 standard for anti-theft protection.
4. **Is assembly complicated?**
No, it is supplied in a prefabricated assembly kit, with brackets included for floor fixing.
5. **Is it possible to install more than one in series?**
Yes, the system is designed for series connections, ideal for large-scale installations.

Mini buying guide:

When managing bike parking in **high-traffic spaces**, such as squares, schools, or companies, it is essential to focus on products that are **safe, resistant, and practical to install**.

The **H1023_11 rack** meets these needs thanks to its **double-sided construction**, which optimizes space usage, and the **anti-theft eyelets** that protect every bicycle.

The **red plastic coating** on the supports prevents damage to the frames and ensures visibility and order, while the **500 mm distance between stations** offers enough space for bicycles of all types.

With its **modular design**, it is also ideal for serial installation projects.

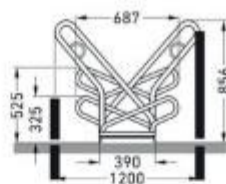

4-seater double-sided bike rack, public bike racks with anti-theft eyelets, steel rack for e-bikes, rack with red plastic-coated supports, urban furniture for bike parking, floor rack for public spaces, DIN 79008 bike parking, modular bike racks for serial installation.
