

4-seater spring rider h749_06

Multi-user octopus-shaped spring rider in two-tone HDPE for 4 children. Dimensions 100x100 cm, ideal for socialization in public playgrounds.

The **h749_06** spring rider is play equipment designed for installation in public parks, schools, and outdoor recreational areas. The structure, characterized by a friendly **octopus** shape, is configured to accommodate up to **four children simultaneously**, using the tentacles as ergonomic seats. This particular configuration promotes social interaction and cooperative play, while stimulating balance and motor coordination in the preschool age group.

The construction uses 19 mm thick two-tone **HDPE panels** (High-Density Polyethylene), a material chosen for its high resistance to atmospheric agents, UV rays, and intensive mechanical stress typical of public spaces.

Technical features

- **Dimensions:** 100 x 100 x h 80 cm
- **Material:** 19 mm high-density two-tone HDPE
- **Capacity:** 4 simultaneous seats
- **Recommended age group:** 2-6 years
- **Free fall height (FFH):** less than 100 cm
- **Safety area:** 6.5 sqm
- **Configuration:** Octopus design with integrated seats
