

4-seater waiting room bench h1038_05

Professional 4-seater bench for waiting rooms. Steel and aluminum structure with perforated sheet metal seats, designed for airports, hospitals and large public spaces.

The **waiting room bench h1038_05** is a 4-seater seating system developed for the furnishing of high-traffic areas. Designed to combine robustness and reliability, this bench solves seating needs in large spaces thanks to the use of technical materials such as steel and aluminum. The supporting structure consists of a **steel tube beam**, while the seats are characterized by a particular design of **perforated sheet metal seat and backrest**. Integrated aluminum armrests complete the configuration, offering a durable and functional solution for managing collective waits.

Technical features

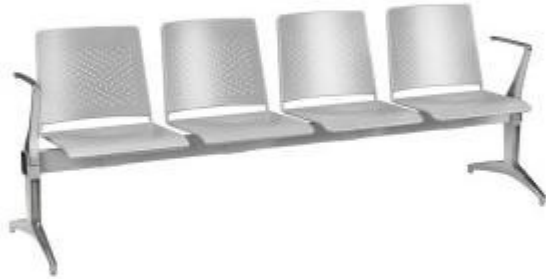

- **Capacity:** 4 seats.
- **Seat and Backrest:** In perforated sheet metal.
- **Supporting structure:** Steel tube beam.
- **Legs:** In aluminum or steel.
- **Armrests:** In aluminum.
