

## 4-section hydraulic stretcher h634\_88

Stretcher with backrest and femoral sections adjustable via gas springs. Dimensions: L.2090 x W.820 x H.550-850 cm.

The **h634\_88 hospital stretcher** is designed to ensure maximum patient comfort and practical use for medical staff. Thanks to the **gas spring adjustment system**, the backrest and femoral sections easily adapt to the patient's needs. The **epoxy powder-coated steel frame** ensures corrosion resistance and easy sanitization. Ideal for hospitals and clinics, this stretcher offers **stability, versatility, and safety**, adapting to the most demanding contexts thanks to the possibility of mounting **optional components** on the integrated multifunctional supports.

Buy now the adjustable hospital stretcher or **request a personalized quote** for your needs!

### Technical specifications:

- **Backrest section:** adjustable via gas springs.
- **Pelvis section:** fixed.
- **Femoral section:** adjustable with gas springs and a dedicated handle.
- **Leg section:** adjustable with a 5-position telescopic joint.
- **Bed frame:** steel with multifunctional supports.
- **Frame material:** epoxy powder-coated steel, corrosion-resistant.
- **Lying surface:** radiotransparent HPL with mattress retainers.
- **Variable height:** hydraulically adjustable from 550 mm to 850 mm via pedal.
- **Trendelenburg and Reverse Trendelenburg movement:** operated via bilateral pedals.
- **Wheels:** Ø 200 mm non-marking, swiveling with ball bearings.
- **5th directional wheel:** Ø 150 mm, pedal-activated.
- **Braking system:** 3-position pedal (free wheels, braked, 5th directional wheel).
- **Side rails:** aluminum alloy, foldable and easily sanitized.
- **Mattress:** static, removable cover in polyurethane foam (8 cm).
- **Mattress cover:** bi-elastic fabric, fire-retardant, antibacterial, and antifungal (class 1IM).
- **Protective cover:** technopolymer for mechanism protection.
- **Cylinder holder compartment:** integrated into the cover.

#### Optional:

- **IV pole:** steel, height-adjustable, 4 hooks

### User benefits:

- **Optimal comfort** thanks to the adjustable sections.
- **Easy sanitization** with materials resistant to hospital disinfectants.
- **Maneuverability** ensured by non-marking wheels and a 5th directional wheel.
- **Advanced safety** with containment side rails.
- **Versatility** thanks to multifunctional supports for optional accessories.

### FAQ:

### 1. What are the dimensions of the stretcher?

The height varies from a minimum of 550 mm to a maximum of 850 mm.

### 2. How are the sections adjusted?

Via gas springs and handles strategically positioned to assist medical staff.

### 3. Is the stretcher easy to sanitize?

Yes, all steel parts are resistant to common chemical agents used in hospitals.

### 4. Is the stretcher compatible with optional accessories?

Yes, it features integrated multifunctional supports for the installation of optional components.

## Mini buying guide:

When choosing a **hospital stretcher**, it is important to consider some fundamental characteristics to ensure comfort and functionality. The adjustment of the sections is essential to adapt the patient's position to medical needs. Adjustments via **gas springs** for the backrest and femoral sections allow for smooth and precise movements. Frame materials, such as **epoxy powder-coated steel**, guarantee corrosion resistance and easy sanitization with common hospital disinfectants. Mobility is another crucial aspect: **non-marking swiveling wheels** and the **5th directional wheel** ensure easy maneuvers even in tight spaces, while the **three-position braking system** guarantees control and safety. Patient comfort is also decisive: a **polyurethane foam mattress** with fire-retardant and antibacterial coating offers a safe and hygienic support. Finally, check for the presence of multifunctional supports for optional accessories such as IV poles or cylinders, thus increasing the stretcher's versatility.
