4-section tilt test couch h731_35

4-section medical couch with tilt test, electric tilt up to 90°, adjustable height 56-106 cm, maximum load 180 kg, in fireproof imitation leather.

Professional couch designed for examinations in the supine position and for performing **tilt tests** in cardiology and physiodiagnostics. Equipped with a **mains-powered electric** tilt system, it allows for precise and repeatable adjustments, essential for standardized diagnostic protocols.

The **4-section platform** offers operational versatility: the head section is adjustable with a gas spring system via an ergonomic lever in positive up to +80° and in negative down to -20°, while the overall height varies from 56 to 106 cm via a dedicated control, ensuring ergonomics for operators of different statures and accessibility for patients with reduced mobility.
