

4-unit PVC recovery cage h601_37

4-unit veterinary cage, stainless steel structure, removable PVC dividers, for pre/post-operative recovery.

The veterinary clinic cage represents the ideal solution for offering patients a safe and protected hospitalization during the recovery period preceding or following a surgical operation. It allows for effective management of hospitalization space with compositional flexibility, adapting sections to different patients and clinical needs.

The structure is characterized by **robustness and reliability**. The lower frame is made of **AISI 304 stainless steel**, a material resistant to corrosion and sanitization procedures. The **removable non-toxic PVC dividers** allow the hospitalization to be configured as separate single units or as a single shared space in the lower and upper parts. The **removable divider guides** facilitate fast patient positioning and ensure stability during use.

Technical features

- Lower frame in AISI 304 stainless steel
- Removable non-toxic PVC dividers: 2 pieces
- Removable divider guides
- Number of units: 4
- Dimensions: W. 121 × D. 72 × H. 190 cm
