

4-wheel cylinder trolley h55_57

4-wheel gas cylinder trolley, raised plate with containment edge, ergonomic push handles, 60 kg capacity, Made in Italy.

Trolley specifically designed for the safe transport of gas cylinders in professional and industrial environments. The robust structure ensures stability on various surfaces such as stoneware, asphalt, concrete, and resin, while the ergonomic push handles facilitate movement even in confined spaces. The cylinder is positioned on a plate raised 490 mm from the ground, protecting it from wear and accidental damage.

The safety system integrates a 3 cm containment edge on the support plate and tubulars with a white painted chain at the top, ensuring the cylinder is locked during transport. The structure is made of **electrowelded** tubulars, plate, and hoops for superior structural strength, with acrylic powder coating in white RAL 9010.

Technical features

- 4 black rubber wheels, 100 mm diameter
- Trolley dimensions: 460 × 450 × 920 mm (h)
- Cylinder support plate: 190 × 190 mm
- Plate height from ground: 490 mm
- Double push handle with 430 mm distance between grip points
- Ergonomic handle
- Cylinder compatibility: diameter 160/190 mm, capacity 5/7 liters
- Maximum load capacity: 60 kg
- Self-weight: approx. 13 kg
- Containment edges: 3 cm high
- White painted safety chain
- Electrowelded tubulars, plate, and hoops
- Acrylic powder coating
- Color: White RAL 9010
- Regulatory compliance: CE
- Origin: Made in Italy
