

40 cm foam stairs h999_21

Soft psychomotor stairs in polyurethane foam, 40x50x20 cm. Orange stackable module with antibacterial and bite-resistant coating.

The **stackable soft stairs** are a professional psychomotor module designed for the specific needs of children in the **18 months - 3 years** age group. Used in educational contexts such as nurseries and preschools, this element facilitates the learning of coordinated movement, allowing little ones to experience climbing up and down in total safety. The structure solves the storage problem in multifunctional environments thanks to its modular design that allows several elements to be easily stacked with ease.

Technical features

- **Internal material:** Polyurethane foam with 25 kg/m³ density, calibrated for child load-bearing capacity.
- **Upholstery:** Leather-effect fabric, antibacterial, non-toxic and bite-resistant certified.
- **Dimensions:** W 40 x D 50 x H 20 cm.
- **Safety:** Non-slip bottom surface to ensure stability on smooth floors.
- **Modularity:** Stackable design for optimizing space after use.
- **Compliance:** Product compliant with REACH, EN71-3 (Safety of toys), ISO 9001:2015 and ISO 14001:2015 regulations.
