

5-bike bicycle rack h729_54

5-seater wood and metal bike rack for public spaces. Galvanized steel structure with pre-treated wood posts and decorative spheres. Dimensions: 187 x 39 x 62.5 cm.

The **5-bike bicycle rack** (model h729_54) is a wood and metal bike rack developed for urban furniture and the organization of parking areas. The device is designed to accommodate a **configuration of 5 bikes side-by-side**, allowing for the orderly management and positioning of vehicles. The structure combines different materials: it features posts made of pre-treated wood, topped by decorative galvanized steel spheres, and wheel supports made of fully welded tubular steel. The entire metal compartment features a galvanized structure, specifically to guarantee high resistance to corrosion and the continuous action of atmospheric agents during permanent exposure in outdoor sites.
