

5-seater bike rack anthracite grey color h28745

Vertical bike rack with 5 spaces and suitable for ground anchoring. Equipped with lateral vertical supports with decorative sphere. Length 1990 mm.

The bike rack is an item of **urban** or **apartment building furniture** that allows for the safe parking of bicycles.

The **5-seater** product is therefore perfect for placement in urban centers, stations, parks and schools.

The **load-bearing structure** of the bicycle rack is composed of **galvanized steel round tube diameter 40 x 1.5 mm** while, the **bicycle parking elements** are in **galvanized steel round tube diameter 25 x 1.5 mm**.

The **designer bike rack** is characterized by the presence of lateral **vertical supports** made of steel round tube diameter 80 mm and a **decorative sphere** placed at the top of them.

The **anthracite grey vertical rack** is designed for **ground fixing** via round plates present at the ends of the vertical supports.

Technical features:
