

5-seater changing room bench for nursery school h681_39

5-seater changing room bench in birch plywood (120x35x132 cm) with rounded edges and raised base for safety in nursery schools.

The **changing room bench h681_39** is a technical furnishing module specifically designed for the setup of filter zones and changing rooms in early childhood educational contexts, such as kindergartens and nursery schools. The structure is configured to accommodate up to **5 children simultaneously**, promoting the autonomous organization of clothing and personal accessories in an orderly and safe environment.

Entirely made of **class E1 birch plywood panels** with a thickness of 18 mm, the bench guarantees high mechanical resistance to daily stress. The surface finishing cycle includes double sanding and the application of a protective primer, completed by a 20-gloss matte clear varnish, which preserves the naturalness of the wood while offering an effective barrier against wear and humidity.

Technical characteristics

- **Dimensions:** W 120 x D 35 x h 34/132 cm
- **Capacity:** 5 individual seats
- **Material:** class E1 birch plywood, 18 mm thickness
