

5-shelf service trolley h220_352

Nickel chrome steel service trolley with 5 shelves, 920x600x1540 mm. Vertical solution for logistical optimization in professional kitchens.

The **service trolley h220_352** is designed to meet handling and temporary storage needs within professional kitchens, food laboratories, and canteens. Made of **nickel chrome steel**, this support guarantees high resistance to oxidation and ease of sanitation essential in HACCP contexts. The five-level configuration allows for vertical space exploitation, optimizing workflows in environments where floor space is limited.

Technical specifications

- **Material:** High-resistance nickel chrome stainless steel
- **Configuration:** 5 shelves with dimensions 827x510 mm
- **Clearance:** 265 mm between shelves for storing containers and tableware
- **Handling:** 4 swivel castors with a 100 mm diameter for smooth steering
- **Total dimensions:** 920x600x1540 mm (height included)
- **Load capacity:** Nominal capacity of approximately 30 kg for each single shelf
