

5-shelf service trolley h712_57

5-tier stainless steel serving trolley (85x53x154 cm). Hygienic HoReCa structure with swivel braking wheels and anti-collision bumpers.

The **h712_57 serving trolley** represents an essential professional solution for organization and movement within hospitality and gastronomic contexts. Entirely made of **stainless steel**, the trolley combines a brilliant aesthetic with high performance in terms of hygiene and corrosion resistance, making it suitable for food contact and intensive use in humid environments such as kitchens and laboratories.

The **5-shelf** configuration allows for the optimization of vertical space, facilitating table clearing operations or the simultaneous transport of a large number of dishes and drinks. Maneuverability is guaranteed by a system of **4 swivel wheels** equipped with anti-collision protections, designed to safeguard both the trolley structure and the surrounding furniture during transit.

Technical features

- **Total dimensions:** W.85 x D.53 x h.154 cm
